Phase III: sample JUnit tests

In PIII/sampleTests, there are:

- 3 sample CSV files
- SampleTests.java: a set of 3 JUnit tests

Run these tests! This isn't a complete test suite, but you can use it to verify that your output is formatted properly and you can add more tests.

Note: for Phase III, remark requests that involve code changes will only be accepted if your submission passes these three tests.

Last lecture: Wednesday 1 April

- Course summary; about the exam
- Project showcase: bring your app so you can demo it for your classmates.
