Let E be the set defined by:
       Consider the set E "built" by
            Let E be the smallest set such that:
                    The string x,y,z \in \mathbb{E}
                    · If e,e = E then the strings
            (e,+e<sub>2</sub>), (e, ×e<sub>2</sub>), (e,-e<sub>2</sub>) \in \mathbb{E} in Python: ('+'e_1'+'e_2'+')'+\cdots
 xe E
 yeE
 zeF
  x \in E and y \in E so (x+y) \in E
x \in \mathbb{F} and x \in \mathbb{F} so (x+x) \in \mathbb{F}
 So are (x-z), (y/y), (x+y)xy), ((x+x)x(y/y)), etc.
 but w € E
 For (x+y) \in E, we call x,y variables and call + operator.
 For e \in E, let v(e) be the number of coaurences of variables in e; o(e) be the number of
occurences of operators in e.
Prove \forall e \in E, v(e) = O(e) + 1
By Structural Induction:
Base case: x,y,z each of those is a variable, there are no operations.
                                                                                      V(x) = 1 = 0 + 1 = O(x) + 1,
                                                                                      V(y) = 1 = 0 + 1 = 0(y) + 1,
                                                                                     V(z)=1=0+1=0(z)+1
 Inductive Step: let e_1, e_2 \in E.
 Assume V(e_1)=O(e_1)+1, V(e_2)=O(e_2)+1 (IH)
Then \vee(e_1+e_2)=\vee(e_1)+\vee(e_2)
             If the + on the left stands for a string,
              / while the one on the right means addition
                      O((e,+ez))=O(e,)+1 (for '+')+ O(ez).
                                                                                                                                           (<del>*</del>)
             V(e_1)+V(e_2)=O(e_1)+V(e_2)+V(e_2)+V(e_3)+V(e_3)=O(e_1)+V(e_2)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+V(e_3)+
                                      =(0(e_1)+1+0(e_2))+1
                                    =0(e_1+e_2)+1 by (*)
           V((e_1 \times e_2)) = V(e_1) + V(e_2) = (O(e_1) + 1) + (O(e_2) + 1) by (IH)
Let \odot be one of +, \times, /, - . then :
                                                                    V((e, ⊙e2)) = ···
                                                                                                            Binary Tree
 Let BT be defined by:
                    - empty ∈ BT
                   - If t_l, t_r \in BT, then the tree t with a root node and left and right subtrees
                             ti, tr is in BT.
Let's define for t \in BT, height(t).
```

-height(empty)=0 -Let the a tree with left and right subtrees $t_l \in BT$, $t_r \in BT$, then $h(t)=1+\max(h(t_l),h(t_r))$. Number of leaves ≤ 2 h(t)-1 leaves(empty)=0 For t with subtrees t_r,t_l : leaves(t)=leaves(t_l)+leaves(t_r).
