Test 1 logistics

- L5101: Feb 16, 6:10pm
- L0101: Feb 17, 10:10am
- In our regular lecture rooms
- Duration: 45 minutes

Test 1 content

- Closed book, but we will provide docstrings for the functions and methods you will need (like those from `help()`).
- no computers, calculators or other aids
- Anything up to, but not including, while loops could be on the test.
- Lectures, readings, labs, E1, A1
- Sample tests are posted on the "tests" page.

Advice on studying

- Address your "not sure" list.
- Get solid on tracing code and drawing the memory model; use the debugger to help you.
- Go back and redo/complete labs on topics where you need practise.
- Make sure you fully understand what you did for A1, even the parts your partner worked on.
- Write practise tests.
- Don't memorize. It won't help.
