Computer Science
UNIVERSITY OF TORONTO

Exercise 1: pre-marking

The pre-marker ran yesterday afternoon and at 9:00pm.

To earn the 1%, your submission must pass all 4 tests.

43 students have already earned the 1% for E1!

To see the pre-marking results:

- run `svn update`

- look at results in `result.txt` and (if present) `error.txt`

- note: if there was an error at some point when the pre-marker ran (e.g., no submission), `error.txt` will be present in your repository from then on. If during the most recent pre-marking run there were no errors, that file will be empty.

Exercise 1: pre-marking schedule

Thursday 15 January 9:00pm (completed)

Friday 16 January 9:00pm

Saturday 17 January 9:00pm

Sunday 18 January 9:00pm

Monday 19 January 9:00pm

Tuesday 20 January noon

If all goes as planned, the results (`report.txt` and `error.txt`) should be checked into your repository within one hour of that time.
